The tradition of Chan Buddhism—more popularly known as Zen—has been romanticized throughout its history. In this book, John R. McRae shows how modern critical techniques, supported by recent manuscript discoveries, make possible a more skeptical, accurate, and—ultimately—productive assessment of Chan lineages, teaching, fundraising practices, and social organization. Synthesizing twenty years of scholarship, Seeing through Zen offers new, accessible analytic models for the interpretation of Chan spiritual practices and religious history. Writing in a lucid and engaging style, McRae traces the emergence of this Chinese spiritual tradition and its early figureheads, Bodhidharma and the "sixth patriarch" Huineng, through the development of Zen dialogue and koans. In addition to constructing a central narrative for the doctrinal and social evolution of the school, Seeing through Zen examines the religious dynamics behind Chan 's use of iconoclastic stories and myths of patriarchal succession. McRae argues that Chinese Chan is fundamentally genealogical, both in its self-understanding as a school of Buddhism and in the very design of its practices of spiritual cultivation. Furthermore, by forgoing the standard idealization of Zen spontaneity, we can gain new insight into the religious vitality of the school as it came to dominate the Chinese religious scene, providing a model for all of East Asia—and the modern world. Ultimately, this book aims to change how we think about Chinese Chan by providing new ways of looking at the tradition.

The measure of the executive, Peter Drucker reminds us, is the ability to 'get the right things done'. Usually this involves doing what other people have overlooked, as well as avoiding what is unproductive. He identifies five talents as essential to effectiveness, and these can be learned; in fact, they must be learned just as scales must be mastered by every piano student regardless of his natural gifts. Intelligence, imagination and knowledge may all be wasted in an executive job without the acquired habits of mind that convert these into results. One of the talents is the management of time. Another is choosing what to contribute to the particular organization. A third is knowing where and how to apply your strength to best effect. Fourth is setting up the right priorities. And all of them must be knitted together by effective decision-making. How these can be developed forms the main body of the book. The author ranges widely through the annals of business and government to demonstrate the distinctive skill of the executive. He turns familiar experience upside down to see it in new perspective. The book is full of surprises, with its fresh insights into old and seemingly trite situations.
