Bmw B38 3 Cylinder Gasoline

The BMW B38 is a turbocharged straight-three petrol engine, which replaced the straight-four BMW N13 and has been in production since 2013. It is part of a modular BMW engine family of straight-three (B38), straight-four and straight-six petrol engines, which use a displacement of 500 cc (30.5 cu in) per cylinder. The B38 is used in front-wheel drive cars (such as the Mini Hatch and BMW 2 ...

### Here's The Problem With Three-Cylinder Engines

BMW B38. BMW's plan with its three-cylinder engine was always to use it in large as well as small models, and it made its intentions clear in 2013 when it launched the hybrid-assisted i8 sports car. In the i8, the 1,499cc turbocharged unit developed 228bhp, but it's in lower performance packages that it is now most prevalent.
