Building the H Bomb: A Personal History can at times get very technical. While the author does try to make this subject very accessible to the layman there is little this or any author can do to Nuclear science painfully easy to understand to those who lack a love and understanding of basic nuclear physics.

Kenneth W. Ford (Goodreads Author) 3.94 · Rating details · 168 ratings · 18 reviews. In this engaging scientific memoir, Kenneth Ford recounts the time when, in his mid-twenties, he was a member of the team that designed and built the first hydrogen bomb. He worked with - and relaxed with - scientific giants of that time such as Edward Teller, Enrico Fermi, Stan Ulam, John von Neumann, and John Wheeler, and here offers illuminating insights into the person.

Building the H Bomb - World Scientific

Building the H Bomb has an unusual structure. I call it a three-stranded braid. I wanted the book to be, first, a memoir: the informal, chatty story of a young theoretical physicist helping to design the world's first hydrogen bomb and, in the process, learning to love the West (strand 1).

Building The H Bomb A Personal History PDF

In his 1995 book *Dark Sun: The Making of the Hydrogen Bomb*, author Richard Rhodes describes in detail the internal components of the "Ivy Mike" Sausage device, based on information obtained from extensive interviews with the scientists and engineers who assembled it. According to Rhodes, the actual mechanism for the compression of the secondary was a combination of the radiation pressure, foam plasma pressure, and tamper-pusher ablation theories described above; the radiation from the ...

Building The H Bomb A Personal History [PDF, EPUB EBOOK]

“ Building the H Bomb ” is a rather charming and quite readable account of a young man finding his way in the midst of momentous scientific and political upheaval. It is not a history of the H-Bomb. For that, one still needs to turn to Richard Rhodes ’ “ Dark Sun ” and other works. Dr.

Building The H Bomb

The book delivers in spades. I realize now the reason the book is so short is the same reason virtually any other book on H bombs is short: most of the material is still classified. (Richard Rhode's, *The Making of the Hydrogen Bomb*, is a longish book. But less than 10% of it is actually about the design, assembly, and testing of H bombs.)
