This comprehensive introduction to Electronic Communications explores fundamental concepts and their state-of-the-art application in radio, telephone, facsimile transmission, television, satellite and fiber optic communications. It provides an explanatory as well as descriptive approach, avoids lengthy mathematical derivations and introduces the use of Mathcad for problem-solving in select areas.

Because terrorists are made, not born, it is critically important to world peace that detainees and inmates influenced by violent ideology are deradicalized and rehabilitated back into society. Exploring the challenges in this formidable endeavor, Terrorist Rehabilitation: The U.S. Experience in Iraq demonstrates through the actual experiences of military personnel, defense contractors, and Iraqi nationals that deradicalization and rehabilitation programs can succeed and have the capability to positively impact thousands of would-be terrorists globally if utilized to their full capacity. Custodial and community rehabilitation of terrorists and extremists is a new frontier in the fight against terrorism. This forward-thinking volume: Highlights the success of a rehabilitation program curriculum in Iraq Encourages individuals and governments to embrace rehabilitation as the next most logical step in fighting terrorism Examines the recent history of threat groups in Iraq Demonstrates where the U.S. went awry in its war effort, and the steps it took to correct the situation Describes religious, vocational training, education, creative expression, and Tanweer programs introduced to the detainee population Provides insight into future steps based on lessons learned from current rehabilitation programs It is essential that we shift the focus from solely detainment and imprisonment to addressing the ideological mindset during prolonged incarceration. It is possible to effect an ideological transformation in detainees that qualifies them to be reclassified as no longer posing a security threat. This volume demonstrates that with the proper program and encouragement, a detainee's misunderstanding or extremist ideology can be replaced with the principles of moderation, toleration, and coexistence.

Examining the UK Disability Discrimination Act (DDA) in comparison to its counterparts in the USA and Australia, this book focuses on how it is being interpreted and acted upon in the context of higher education, a key area of national attention in the UK. It also evaluates this law in the context of the larger project of civil rights legislation and demonstrates that geography can be used to explain law and legal arguments by highlighting their subjectivity and by emphasizing the importance of place, specificity and context. While providing in-depth analysis of the effectiveness and scope of this significant legislation this book demonstrates the importance of geography in the application of law. It provides insights into the broader workings of UK anti-discrimination law, which are particularly relevant given the scrutiny of the Equality and Human Rights Commission and the concerns about the effectiveness of legal tools in fighting discrimination. Finally, this book critiques liberal notions of legal subjectivity and medical definitions of disability which is topical given the current attention given to debates about identity politics.

These Westmoreland men know exactly what they want in these two classic, fan-favorite novels from New York Times bestselling author Brenda Jackson □ collected here in one volume! Quade's Babies Quade Westmoreland's one-night love affair with Cheyenne brands him body and soul, but he never even learns her last name. Almost a year later, driven by sensual memories and one incriminating photo, the sexy operative finally tracks her down—and discovers three little babies who look just like him. Learning he is a father makes Quade even more determined: he wants Cheyenne Steele to be his very own. Shockingly, the irresistible beauty seems intent on refusing him. But Cheyenne and their children are now part of the Westmoreland destiny, and Quade vows to fight for a future together. Originally published in 2008 Tall, Dark—Westmoreland! She longs for a taste of the wild and reckless. And Olivia Jeffries gets her chance when she meets a handsome stranger at a masquerade ball. The attraction is instant, and the electricity is volatile. But days later she discovers that her new lover is none other than Reginald Westmoreland, her father's most-hated rival. She vows to resist him, but Reggie won't ignore the attraction they share and will stop at nothing to get Olivia back in his bed and him into her heart. Originally published in 2009

Sexuality and justice often seem odd bedfellows. Sexual embraces of intimacy and passion thrive in our private lives, while justice safeguards the laws and duties that govern the public realm. Yet intuitively, we sense there are deeper connections. Both sexuality and justice support the holistic ideal proclaimed by the early Christian writer Ireneaus: the glory of God is the human person fully alive. Evelyn and James Whitehead combine professional expertise as a psychologist and historian of religion as well as personal experiences and extensive research to explore the interplay of sexuality, love, and justice on the spiritual journey today. While drawing on biblical themes and contemporary psychological insight, the Whiteheads examine modern experiences of attachment and vulnerability, marriage and friendship, compassion and sexual diversity, and the psychological and spiritual experiences of transgender persons—a new and often bewildering consideration for many Christians. Included is a reflection on a prophetic Christian ministry in support of sexuality and justice that illustrates the importance of moral awareness and sensual attunement to the world. Fruitful Embraces utilizes Christian theology and effective pastoral ministry to explore the vital connections between sexuality and Christian spirituality and links between compassion and justice that will encourage anyone on a spiritual journey to open their hearts and minds to the extravagant diversity of creation.

Against all odds, Piper Anderson has managed to pick up the pieces of her life. She's holding tight to her budding romance with Officer Bobby Wright, anxious to have her moment with him. Now encircled by fiercely loyal friends, she finally feels like she's standing at the edge of a normal life. That is until reports of a brutal attack at the local college campus turn her dream of happily ever after into a nightmare. The unmistakably familiar details of the attack are an instant reminder of the chains tying her to people and places she so badly wants to escape. With her life and friends in danger, Piper must confront her past in order to fight for her future. To make matters worse, Piper and Bobby once again find their moral compasses pointing them in opposite directions. But what Piper doesn't know is that Bobby has secrets of his own. How can their love survive when their pasts have shaped them so differently? Piper's choices could bring her the freedom she yearns for, but will cutting ties with the past sever her relationship with Bobby?

Whether you're relatively new to git or you need a refresher, or if you just need a quick, handy reference for common tasks in git, Git Recipes is just the reference book you need. With recipes to cover any task you can think of, including working with GitHub and git on BitBucket, Git Recipes shows you how to work with large repositories, new repositories, forks, clones, conflicts, differences, and it even gives you practical scenarios you may find yourself dealing with while using git. If you work with Git at all, you need this hands-on, practical reference for all things Git.

Parents will welcome Brazelton's uniquely empathetic, wise, and helpful approach to this inevitable and often trying issue. Toilet training is a job for the child and not the parent, and by trying to force the issue or even encourage too hard, parents can set the stage for trouble. By "listening to the child," parents will know when their child is ready, and by guiding children in a series of gentle small steps, parents can help them make the accomplishment their own. A generation and more of children have been trained "the Brazelton way," and now he and Dr. Sparrow have distilled this advice into one priceless little guide. They first lay out the Touchpoints approach to the issue (a "mistake" can mean the child is making progress on some other front), then discuss the timing of this big achievement, and finally deal with how to respond if problems occur. For parents who want to get past this issue cheerfully, with the least fuss and turmoil, this is the one and only book to get.

This official NASA history document provides enlightening tales about the Apollo lunar landing program by those who were there: astronauts (Duke and Schmitt), managers and scientists (von Braun, Webb, Paine, Gilruth, Mueller, Low, Faget, Rogers, Guin), and a protocol assistant who accompanied the Apollo 11 on their whirlwind presidential goodwill mission (Barnes). From the foreword by Christopher Kraft: For a project as massive as the Apollo program, history may distance itself to the extent where modern interpretation distills a feeling that such events took place without extensive human involvement. Nothing could be further removed from the truth. Through the verbal accounts offered by the oral histories such as presented in this volume, we are reintroduced to the critical human factor which is the essence of any history. People made Apollo happen and it is important to preserve their thoughts, feelings, and recollections for future generations. The oral histories presented in this volume offer a sample of what NASA has done to preserve the story of Apollo as part of our nation's human spaceflight heritage. The accounts included in this book are a small sampling of the large number of oral histories that have been conducted under the auspices of the NASA history program, since near the beginning of the Agency. They also represent the many personal contributions made during Project Apollo, the single largest peacetime endeavor in American history. These recollections span the origins, management, and completion of that enormous effort and measurably enhance our appreciation of its difficulty. I am pleased that the comments of some of the key individuals involved in Project Apollo are being preserved by NASA and made available through this book. The people who are quoted in this book were among the top leaders of NASA. All of them played a prominent part in the conduct and accomplishments of Apollo. As one of those who knew and watched these individuals lead, I have a particular sense of their statements. I always had the feeling of having been granted a special privilege to participate and work on the Mercury, Gemini, and Apollo programs. The contents of this book reveal that these people had similar experiences. They all recognized that it took literally thousands of dedicated people to bring these efforts to fruition and that it was up to them to provide the necessary leadership to allow all of the workers on the project to accomplish their tasks. It was a wondrous thing to watch. Anyone interested in the underlying strength of NASA in this time period will find these accounts a fascinating read.

This book is based around the author's beautiful and sometimes awe-inspiring color images and mosaics of deep-sky objects. The book describes how similar "Hubble class" images can be created by amateur astronomers in their back garden using commercially available telescopes and CCD cameras. Subsequent processing and image enhancement in the "electronic darkroom" is covered in detail as well. A range of telescopes and equipment is considered, from the author's 11-inch with Hyperstar camera, down to more affordable instruments. Appendices provide links to free software □ not available from a single source □ and are themselves an invaluable resource.
