installation. Modular construction is aimed at minimising construction time by standardising design components, providing consistent quality and allowing site preparation and building activities to commence concurrently with the construction of the factory-made modules. Snagging The process of formally inspecting the construction works to identify any incomplete works or defects in completed works. A snagging list (or "punch list") is a schedule of defects resulting from this inspection. These items typically need to be rectified prior to the issuing of a completion certificate or handing-over of the works although in some cases a completion certificate will be issued with a snagging list attached.
