Contains geographical, political, and economic assessments for the British delegates to the 1919-1920 Paris Peace Conference.

In a world of increasing dependence on information technology, the prevention of cyberattacks on a nation's important computer and communications systems and networks is a problem that looms large. Given the demonstrated limitations of passive cybersecurity defense measures, it is natural to consider the possibility that deterrence might play a useful role in preventing cyberattacks against the United States and its vital interests. At the request of the Office of the Director of National Intelligence, the National Research Council undertook a two-phase project aimed to foster a broad, multidisciplinary examination of strategies for deterring cyberattacks on the United States and of the possible utility of these strategies for the U.S. government. The first phase produced a letter report providing basic information needed to understand the nature of the problem and to articulate important questions that can drive research regarding ways of more effectively preventing, discouraging, and inhibiting hostile activity against important U.S. information systems and networks. The second phase of the project entailed selecting appropriate experts to write papers on questions raised in the letter report. A number of experts, identified by the committee, were commissioned to write these papers under contract with the National Academy of Sciences. Commissioned papers were discussed at a public workshop held June 10-11, 2010, in Washington, D.C., and authors revised their papers after the workshop. Although the authors were selected and the papers reviewed and discussed by the committee, the individually authored papers do not reflect consensus views of the committee, and the reader should view these papers as offering points of departure that can stimulate further work on the topics discussed. The papers presented in this volume are published essentially as received from the authors, with some proofreading

corrections made as limited time allowed.

Britain is at a cross-roads; from the economy, to the education system, to social mobility, Britain must learn the rules of the 21st century, or face a slide into mediocrity. Britannia Unchained travels around the world, exploring the nations that are triumphing in this new age, seeking lessons Britain must implement to carve out a bright future.

The English edition includes statements and speeches by various persons (pp. xvii-xxxviii), the stories of two more Swiss citizens nominated by Yad Vashem for recognition as Righteous of the Nations, and other lesser-known accounts of Swiss citizens who helped save Jews during the war. Some of them are published here for the first time.

Imagine being trapped forever in someone else's nightmare, with no means of escape. Or caught on one of the most terrifying roller coasters of all time, when suddenly the tracks ahead just disappear. Enter the world of Darkness Creeping, where hollow-eyed skulls arrive in the mail and nothing is as it seems. Boston Globe–Horn Book Award winner and beloved author Neal Shusterman walks on the dark side with this classic collection of masterfully creepy stories so horrifying, you may have to read them twice to remind yourself they're not real.
