Separate guidelines are in. place on the Paediatric Intensive Care Unit and NICU for some aspects of enteral feeding procedure and care. In severe or chronic illness, some children require artificial feeding with speciallywill formulated liquid feeds.

### ENTERAL FEEDING GUIDELINE (PAEDIATRIC)

Enteral nutrition is the provision of safe and effective nutritional support through the use of an enteral feeding device. It is generally required when a child is unable to meet their nutritional and/or hydration needs orally. The enteral device may also be used for aspiration purposes, venting and/or administration of medications.

### Guidelines for caring for an infant, child, or young...

The following is a useful guide: 1–2 years, 200 kcal (840 kJ); 3–5 years, 400 kcal (1680 kJ); 6–11 years, 600 kcal (2520 kJ); and over 12 years, 800 kcal (3360 kJ). Supplements containing 1.5 kcal/mL are high in protein and should not be used for children under 3 years of age.

### ESPEN Guidelines

A gastrostomy is an opening through the skin into the stomach – this is created in an operation under general anaesthetic. A feeding device is put into this opening to deliver feed directly into your child ' s stomach, bypassing their mouth and throat. The feed solution contains all the nutrients your child needs to grow and develop.

### Gastrostomy care | Great Ormond Street Hospital

This guideline covers identifying and caring for adults who are malnourished or at risk of malnutrition in hospital or in their own home or a care home. It offers advice on how oral, enteral tube feeding and parenteral nutrition support should be started, administered and

stopped.

~~Overview | Nutrition support for adults: oral nutrition ...~~

Enteral feeding formulae are about 70-80% water and the remainder of the volume consists of solids that are not used as fluid by the body. For accurate calculation of fluid input (eg to meet requirements, or for fluid restrictions), it is important to use the formula 's actual water content, not the total volume of formula being given.
