This synthesis will be of interest to transit agency staff responsible for vehicle maintenance and planning at their agencies. Staff can use this report to learn from the experiences of other agencies, as well as to compare their experiences with those of other agencies. It documents and summarizes transit agency experiences, using various maintenance productivity improvements and programming. The report summarizes the experiences of agencies that vary in size, union affiliation, and operating conditions. It provides descriptions of successful programs and creative modifications to existing programs.

Provides a variety of approaches to transit bus service line and cleaning functions so transit agencies can evaluate the effectiveness of their own operations.

Introduction -- Planning framework -- Estimating BRT ridership -- Component features, costs, and impacts -- System packaging, integration, and assessment -- Land development guidelines.

TCRP Report 94: Fare Policies, Structures and Technologies: Update identifies, describes, and evaluates key fare structures, policies, and technologies that are being considered by transit agencies, with a focus on their impact on customers, operations management, and effective and equitable fare integration. The report includes data on fare structures, policy-making procedures, and ongoing efforts to implement fare technology. This report provides guidance on making decisions related to fare policies, structures, and technologies. It includes practical information that can be readily used by transit professionals and policy makers in fare-related planning and decision making. This report updates information presented in TCRP Reports 10 and 32 and presents the latest developments and research results related to fare policy and technology issues.

Cognitive task analysis was used to design a simulation game that allows managers to rapidly acquire the decision skills needed for identifying the necessary training for new technologies. The game developed is designed to provide simulated experience in making key decisions regarding training during the implementation of new technologies. A Decision Matrix and a Decision Matrix Template are also provided in blank form as an aid in making training decisions. The electronic decision game developed is "The Automatic Bus Announcement System Project."
