Heat Sealing Technology and Engineering for Packaging ...  
Heat sealing is the process of sealing one thermoplastic to another similar thermoplastic using heat and pressure. The direct contact method of heat sealing utilizes a constantly heated die or sealing bar to apply heat to a specific contact area or path to seal or weld the thermoplastics together. Heat sealing is used for many applications, including heat seal connectors, thermally activated adhesives, film media, plastic ports or foil sealing .

Heat sealer - Wikipedia  
Heat seal technology, heat seal parameter, hot tack, failure mode. 1. Heat Seal Technology. Heat sealing package is widely used in daily chemical products, food, pharmaceuticals and other fields. Since leakage usually occurs in the sealing area of the package in the process of product filling. And most of the breakage in actual application also occurs in the sealing area.
