Comment: A copy that has been read, but remains in clean condition. All pages are intact, and the cover is intact. The spine may show signs of wear. Pages can include limited notes and highlighting, and the copy can include previous owner inscriptions.

Organic Chemistry Second Edition: Robert Morrison and ...
Abstract. UV absorption studies on weak interactions of adenine, cytosine, thymine, and uracil with catechol in aqueous solutions containing 0.1 N HCl gave evidence for the formation of charge transfer complexes. The absorptions of these complexes were found in the UV region at longer wavelengths than those of the pure components.
