Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

The need for a cohesive and comprehensive curriculum that intentionally connects standards, instruction, and assessment has never been more pressing. For educators to meet the challenging learning needs of students they must have a clear road map to follow throughout the school year. Rigorous Curriculum Design presents a carefully sequenced, hands-on model that curriculum designers and educators in every school system can follow to create a progression of units of study that keeps all areas tightly focused and connected.

Consolidated Treaties and International Agreements is the only up-to-date publication available that offers the full-text coverage of all new treaties and international agreements to which the United States is a party. Treaties that have been formally ratified but not officially published, as well as those pending ratification, are included to guarantee the most comprehensive treaty information available. Executive agreements that have been made available by the Department of State in the previous year are also included. A unique and thorough indexing system, with indices appearing in each volume, provides readers with quick and easy access to treaties.

NOW IN ITS SIXTH ANNUAL EDITION, The Reality of Aid has for the first time analysed the 'fair share' of bilateral aid for basic social services basic education, basic health, reproductive health, nutrition, clean water and sanitation - that should come from each donor; an analysis which shows only two donors meeting their fair share and the G7 nations (Canada, France, Germany, Italy, Japan, UK, US) falling behind by over US\$5 billion. This year and next, The Reality of Aid focuses on basic education, as a right and not a privilege, and its role in development cooperation and poverty elimination. A key feature of The Reality of Aid 1998/1999 is the ten chapters offering analysis of development cooperation from the perspective of southern NGOs. Many of these focus on basic education and raise issues around transparency, gender and civil society. 'If policies were programmes and promises were dollars, The Reality of Aid could report great progress on the road to eradicating global poverty this year. But at a time when donors acknowledge that ending poverty is possible, it seems that commitments are being offered instead of resources and real change.' From the Summary Part I presents a useful Summary, highlighting the steps that donors could take now to make progress towards poverty eradication, and reviews the trends in development cooperation, debt relief measures targeted towards the new millennium and commitment to the goal of ensuring basic education for all. Part II gives a full report on the overseas aid performance of OECD country aid donors and the European Union over the last year. Part III sets out a Southern perspective on development cooperation. Part IV provides 'at a glance' comparisons of donors' aid outlook and commitment to development cooperation in the 21st Century, poverty eradication, gender and public support. Part V contains handy reference material. Throughout the book, information is presented in easily interpreted diagrams and graphs. The Reality of Aid has established itself as a unique source of independent evaluation and comment on aid policies and development. It is indispensable for all in the field, whether in the official or voluntary sectors. 'Indispensable ... it gives you most of the hard facts you need to know about the major issues' New Internationalist 'The most comprehensive and rigorous independent analysis of the aid and development policies of the world's wealthiest nations ... Essential reading' Charity World 'The Reality of Aid remains an essential purchase by the libraries of development institutions and an invaluable reference for development practitioners' Development & Change 'A reliable 'watchdog' for anyone interested in this important aspect of international relations' ORBIT 'An accessible reference ... [it] encompasses many key issues and stimulates further research' Commonwealth & Comparative Politics Originally published in 1998

Study & Master Life Sciences was developed by practising teachers, and covers all the requirements of the National Curriculum Statement for Life Sciences. Learner's Book: □ module openers, explaining the outcomes & icons, indicating group, paired or individual activities & key vocabulary boxes, which assist learners in dealing with new terms & activities to solve problems, design solutions, set up tests/controls and record results & assessment activities & case studies, and projects, which deal with issues related to the real world, and move learners beyond the confines of the classroom Teacher's Guide: & An overview of the RNCS & an introduction to outcomes-based education & a detailed look at the Learning Outcomes and Assessment Standards for Life Sciences, and how much time to allocate to each during the year & information on managing assessment & solutions to all the activities in the Learner's Book & photocopiable assessment sheets

This comprehensive and cutting-edge book portrays a vision of how digital media can help transform schools, and what kinds of curriculum pedagogy, assessment, infrastructure, and learning environments are necessary for the transformation to take place. The author and his research team spent thousands of hours observing classes and interviewing teachers and students in both successful and unsuccessful technology-rich schools throughout the United States and other countries. Featuring lessons learned as well as analysis of the most up-to-date research, they offer a welcome response to simplistic approaches that either deny the potential of technology or exaggerate its ability to reform education simply by its presence in schools. Challenging conventional wisdom about technology and education, Learning in the Cloud: critically examines concepts such as the "digital divide," "21st-century skills," and "guide on the side" for assessing and guiding efforts to improve schools; combines a compelling vision of technology's potential to transform learning with an insightful analysis of the curricular challenges required for meaningful change; and discusses the most recent trends in media and learning, such as the potential of tablets and e-reading.
