Written solely for the undergraduate audience, *Industrial Organization: Theory and Practice*, which features early coverage of Antitrust, punctuates its modern introduction to industrial organization with relevant empirical data and case studies to show students how to apply theoretical tools.

Production technology and market structure; Basic monopoly pricing and product strategies; Product and pricing strategies for the multiproduct monopolist; Theories of business strategy in oligopoly markets: single-market period models; Monopoly power and predatory conduct; Collusion and cartels; Mergers; Vertical relations and restraints; Advertising; Research and development; Strategic commitments: business tactics trade policy, and network externalities.

The fourth edition of *Industrial Organisation* continues to highlight the strong link between the theory and analysis of industrial economics using engaging case studies. It takes students on a journey through the historical development of industrial organisation to the present day with new case studies exploring contemporary issues in business, finance and economics such as: Corporate governance Executive pay Price Wars Cloud computing Barriers to entry in banking Patent infringement Social networking Mergers in the car industry Outsourcing
