About Us. Here on Mutineer's Moon, we love the work of David Weber, especially his Dahak series, which starts with Mutineer's Moon as the first book. This was the very first novel I had ever read by David Weber, and I was hooked. I dare to say, it was also one of my first space opera books I'd read back then as well. Since then, I have read everything David Weber has written, and while Dahak remained my favorite, I also found his Honorverse series extremely attractive for my tastes.

training flight over the Moon. For Dahak, a self-aware Imperial battleship, it began millennia ago when that powerful artificial intelligence underwent a mutiny in the face of the enemy. The mutiny was never resolved-Dahak was forced to maroon not just the mutineers but the entire crew on prehistoric Earth. Dahak has been helplessly waiting as the descendants of the loyal crew regressed while the mutineers maintained control of technology that kept them alive as the millennia passed. But now Dahak's sensors indicate that the enemy that devastated the Imperium so long ago has returned-and Earth is in their path. For the sake of the planet, Dahak must mobilize its defenses. And that it cannot do until the mutineers are put down. So Dahak has picked Colin MacIntyre to be its new captain. Now MacIntyre must mobilize humanity to destroy the mutineers once and for all-or Earth will become a cinder in the path of galactic conquest. On a flight over the moon, Lt Commander Colin MacIntyre's ship is seized by Dahak, an ancient warship from the Galactic Imperium. Contact with the Imperium must be restored and the Earth united to defend itself -- otherwise the planet is doomed.

Drawn into an alien conflict when his ship is taken over and pitted against a dangerous ancient enemy, Colin MacIntyre takes on the task of defeating a group of immortals who have been secretly ruling the Earth.

Restoring the empire that had been destroyed forty-five years earlier, Emperor Colin finds problems in the genocidal Achuutani and in his children Sean and Harriet, who have been marooned on a hostile planet. Original.

Colin MacIntyre had an orderly but exciting life as a NASA astronaut. But then he is kidnapped by an ancient, self-aware starship; drafted as its captain to suppress a 5,000-year-old mutiny; and forced to declare himself Governor of Earth in order to mobilize the planet against alien attack. And that's the easy part. . . .

When her world is destroyed by seemingly unstoppable planet pirates and her family is slaughtered, former commando leader Alicia DeVries turns pirate herself, steals a cutting-edge ship from the Empire, and launches a campaign to seek revenge on those responsible, only to find that her fellow veterans are equally determined to stop her, in an expanded new version of the classic novel Path of the Fury.

This novel is based on a much shorter version published in David Drake's "Foreign Legions".

Humanity pushed its way to the stars - and encountered the Gbaba, a ruthless alien race that nearly wiped us out. Earth and her colonies are now smoldering ruins, and the few survivors have fled to distant, Earth-like Safehold, to try to rebuild. But the Gbaba can detect the emissions of an industrial civilization, so the human rulers of Safehold have taken extraordinary measures: with mind control and hidden high technology, they've built a religion in which every Safeholdian believes, a religion designed to keep Safehold society medieval forever. 800 years pass. In a hidden chamber on Safehold, an android from the far human past awakens. This "rebirth" was set in motion centuries before, by a faction that opposed shackling humanity with a concocted religion. Via automated recordings, "Nimue" - or, rather, the android with the memories of Lieutenant Commander Nimue Alban - is told her fate: she will emerge into Safeholdian society, suitably disguised, and begin the process of provoking the technological progress which the Church of God Awaiting has worked for centuries to prevent. Nothing about this will be easy. To better deal with a medieval society, "Nimue" takes a new gender and a new name, "Merlin." His formidable powers and access to caches of hidden high technology will need to be carefully concealed. And he'll need to find a base of operations, a Safeholdian country that's just a little more freewheeling, a little less orthodox, a little more open to the new. And thus Merlin comes to Charis, a mid-sized kingdom with a talent for naval warfare. He plans to make the acquaintance of King Haarahld and Crown Prince Cayleb, and maybe, just maybe, kick off a new era of invention. Which is bound to draw the attention of the Church...and, inevitably, lead to war. It's going to be a long, long process. And David Weber's epic Off Armageddon Reef is can't-miss sci-fi. There he was in his sailboat in the middle of the Atlantic, all alone and loving it. Well, there was a US Navy carrier group on his southern horizon, but he was a Navy guy himself, so he didn't mind. Then came the UFOs, hurtling in from the Outer Black to overfly the carriers at Mach 17. Their impossible aerobatics were bad enough^¾but then they started shooting at each other. And at the Navy. With nukes. Little ones at first, but winding up with a 500 megatonner at 90 miles that fried every piece of electronics within line-of-sight. Richard Ashton thought he was just a ringside observer to these now over-the-horizon events. Until the crippled alien lifeboat came drifting down and homed in on his sailboat; suddenly he has his hands full of an unconscious, critically wounded and impossibly human alien warrior who also happens to be a gorgeous female. That's when things got interesting. At the publisher's request, this title is sold without DRM (Digital Rights Management).
