**Odoo Development Essentials - Packt**

Odoo is built using the Python programming language and uses the PostgreSQL database for its data storage, so these are the main requirements we should have in our Odoo host. To run Odoo from source, we will need to install first the Python libraries it depends on. The Odoo source code can then be downloaded from GitHub and executed from source.

Before we dive into Odoo development, we need to set up our development environment and learn the basic administration tasks for it. In this chapter, we will learn how to set up the work environment, where we will later build our Odoo applications. We will learn how to set up a Debian or Ubuntu system to host the development server instances and how to install Odoo from the GitHub source code.
