This issue of Sleep Medicine Clinics is edited by Drs. Brown and Shahrokh Javaheri and focuses on Advanced PAP Therapies and Non-invasive Ventilation. Article topics include: Current Positive Airway Pressure Device Technology: What's in the "black box?"; Testing the Performance of Positive Airway Pressure Generators: From Bench to Bedside; Treatment of Obstructive Sleep Apnea: Choosing the Best PAP Device; Treatment of Obstructive Sleep Apnea: Choosing the Best Interface; Treatment of Obstructive Sleep Apnea: Achieving Adherence and Dealing with Complications; Treatment of Hyperventilatory Central Sleep Apnea: Idiopathic, CHF, Cerebrovascular Disease, and High Altitude; Disordered Breathing Due to Chronic Opioid Use: Diverse Manifestations and Their Management; Obesity Hypoventilation Syndrome: Choosing the Appropriate Treatment for a Heterogeneous Disorder; Positive Airway Pressure Treatment in the Patient with Ventilatory Failure due to Neuromuscular Disease; Non-invasive Ventilation in Acute Ventilatory Failure; Domiciliary Non-invasive Ventilation for Chronic Ventilatory Failure; The Future of Positive Airway Pressure Technology.

Equipment For Respiratory Care is changing the paradigm of historic respiratory care equipment books. Focusing on the principles of the equipment and then concluding with in-depth discussion and practical solutions to complex problems, this focus on the clinical application of patient care enhances key critical thinking skills with clear explanations of the features of the equipment as well as the way it functions. New Approach - Emphasis on clinical application rather than engineering technical detail to drive critical thinking Provides students with the tools to approach equipment troubleshooting rather than have to rely on textbook algorithms Includes case-based critical thinking modules provide the opportunity to develop decision making skills Provides an easy to use, logical approach to tackling clinical or patient and technical problems Helps students select equipment among similar technologies for the equipment most appropriate for patient need Includes illustrations from the

Heighten your intuition, connect with deceased loved ones, and surpass the psychological roadblocks holding you back with psychic medium Rebecca Rosen's fresh and hip prescriptive program, a unique and refreshing blend of self-help wisdom and psychic insight. In Spirited, readers can learn how to dig into their past to identify the root of the "damage" that's keeping them from living their best lives. In her colorful and youthfully vibrant voice, medium-to-the-stars Rebecca Rosen shows us how to draw on the power of our intuitive gifts to connect with spirit energy—loved ones who have passed—to provide the clarity necessary to master real-life issues, including relationships, job fulfillment, finances, and body image.

The fifth edition of Equipment Theory for Respiratory Care employs a comprehensive, competency-based approach to describe the equipment and latest technology used in the respiratory care setting. With an approachable style, the book covers the practice of respiratory theory, including: the administration of oxygen and oxygen mixtures with various devices and appliances; the application of mechanical ventilators to assist or control breathing; management of emergency airways; and applications of ventilators for various populations: neonatal, home care, and transport. Additionally, universal algorithms, an enhanced art program, and Clinical Corner problems round out this new edition. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"This booklet is written for managers and supervisors in industries that involve the manual handling of containers. It offers suggestions to improve the handling of rectangular, square, and cylindrical containers, sacks, and bags. "Improving Manual Material Handling in Your Workplace" lists the benefits of improving your work tasks. It also contains information on risk factors, types of ergonomic improvements, and effective training and sets out a four-step proactive action plan. The plan helps you identify problems, set priorities, make changes, and follow up. Sections 1 and 2 of "Improvement Options" provide ways to improve lifting, lowering, filling, emptying, or carrying tasks by changing work practices and/or the use of equipment. Guidelines for safer work practices are also included. Section 3 of "Improvement Options" provides ideas for using equipment instead of manually handling individual containers. Guidelines for safer equipment use are also included. For more help the "Resources" section contains additional information on administrative improvements, work assessment tools and comprehensive analysis methods. This section also includes an improvement evaluation tool and a list of professional and trade organizations related to material handling."--Page 6.

This book is an introduction to a comprehensive analysis of recent advances and clinical research in noninvasive mechanical ventilation (NIV) in Pulmonary, Critical Care, and Sleep Medicine. The objective of the book is to increase the knowledge and understanding of the reader in the best clinical practice in three main sections. A selected international group of experts in the field of noninvasive ventilation formed a panel to provide an update on the recent literature in the application and efficient utilization of NIV in Pulmonary, Critical Care, and Sleep Medicine. Each particular section will discuss the application of NIV in different disease process. The authors summarized the main results of the recent trials, clinical and technological advances, expert opinions, and practical guidelines. Chapters, summarized by expert committee, provide a "deep and exhaustive critical analysis and summary" of the recent advances in the field of NIV, presented as key points and recommendations for the best clinical practice from articles published in the last decade. The content of the book will serve as a resource and a tool to the practicing physicians toward NIV. Main objective is to increase their proficiency in management of different pathophysiological aspects of the respiratory system. In this line, the book offers to the readers, who are seeking the latest recommendations, the future research directions in noninvasive mechanical ventilation. Table of contents describe and analyze, the items trend setters in noninvasive ventilation, organized in three main sections, "pulmonary", "critical care" and "sleep medicine", using the primary keyword related with term "noninvasive mechanical ventilation" as search term associated with "secondary keywords" studies from a period of 2018 to 2019. This searching methodology and analysis define this unique book to the approach in noninvasive mechanical ventilation for best clinical practice, research, clinical study designs and critical analysis, how noninvasive ventilation is current and trending. Based on this form of conception of book updated, editors and authors consider that this book opens a new and original vision for adequate knowledge and deep updated based on key publications in the period under review, very useful for clinical practice, studies designs and potential new trends in the use of noninvasive ventilation. As such, it is a unique update book resource in noninvasive ventilation in pulmonary, critical care and sleep medicine that may influence current clinical practice and future studies. With ultimate goal is better care and outcome for our patients.
