Research methods are specific procedures for collecting and analyzing data. Developing your research methods is an integral part of your research design. When planning your methods, there are two key decisions

First, decide
how you will
collect data.

~~Research Methods~~

research

involves

systematically

manipulating an

independent

variable and

then measuring

the effect that

it has on a

defined

dependent

variable. One of

the major advantages of this method is that it allows researchers to actually determine if changes in one variable actually cause changes in another.
