A close-up look at the struggle for democracy in Hong Kong. Hong Kong in the Shadow of China is a reflection on the recent political turmoil in Hong Kong during which the Chinese government insisted on gradual movement toward electoral democracy and hundreds of thousands of protesters occupied major thoroughfares to push for full democracy now. Fueling this struggle is deep public resentment over growing inequality and how the political system—established by China and dominated by the local business community—reinforces the divide between those who have profited immensely and those who struggle for basics such as housing. Richard Bush, director of the Brookings Institution ’ s Center on East Asia Policy Studies, takes us inside the demonstrations and the demands of the demonstrators and then pulls back to critically explore what Hong Kong and China must do to ensure both economic competitiveness and good governance and the implications of Hong Kong developments for United States policy.

This text examines the intersection of youth civic engagement, identity, and protest in Hong Kong,

through the lens of education. It explores how education and identity have been protested in Hong Kong, historically and today, and the mark that such contestations have left on education. Many people, particularly outside Hong Kong, were astonished by youth participation in the Umbrella Movement of 2013 – 2014, and the anti-extradition law protests in 2019. These protests have caused people to consider what has changed in Hong Kong over time, and what education has to do with youth civic engagement and political expression. This book provides an academic, theoretically oriented perspective on the intersection of youth identity and education in Hong Kong. Coming from an educational (and philosophical) orientation, Jackson focuses on areas where greater understanding, and greater potential agreement, might be developed, when it comes to education. This book will be of interest to educational policy makers, curriculum specialists, and educational scholars and students in liberal studies, social studies, civic education, comparative and international education, multicultural education, and youth studies.

An in-depth look at how banks and financial institutions manage assets and liabilities Created for banking and finance professionals with a desire to expand their management skillset, this book focuses on how banks manage assets and liabilities, set up governance structures to minimize risks, and approach such critical areas as regulatory disclosures, interest rates, and risk hedging. Explains bank regulations and the relationship with monetary authorities, statements, and disclosures Considers the governance structure of banks and how it can be used to manage assets and liabilities Offers strategies for managing assets and liabilities in such areas as loan and investment portfolios, deposits, and funds Explores capital and liquidity, including current standards under Basel II and Basel III, funding needs, and stress testing Presents guidance on managing interest rate risk, hedging, and securitization

Hong Kong has been one of the fastest growing East Asian economies since the end of the Second World War. The adoption and practice of economic freedom have been major pillars in its economic success. Indeed, the experience of Hong Kong has served as a reference for other emerging economies in the region. The scope of the book elaborates the context and ingredients of economic freedom that have brought success and prosperity to Hong Kong. With sovereignty reversion to China in 1997, it is even more relevant to see how economic freedom is shaping and adapting to the new environment. There exist a number of economic indices based on economic freedom. Hong Kong has been ranked as the freest economy in the world for a number of consecutive years. While the economic freedom indices compare the performance of a large number of world economies, there is a lack of economic literature that studies the absolute level of economic freedom of a single economy. This book boldly serves the purpose of elaborating on the absolute performance of economic freedom in the world's freest economy. It is, therefore, the first of its kind and unique in its field. Numerous areas of studies related to economic freedom are examined, studied and elaborated so that readers can have a full and comprehensive understanding of the content of economic freedom in Hong Kong. The Instructor's Manual and Study Guide is available upon request for all instructors who adopt this book as a course text. Please send your request to sales@wspc.com.

Financial statements facilitate the communication between corporations and various stakeholders. The integrity, stability and transparency of such communication help preserving Hong Kong as a top global financial centre. To many laypersons, looking through financial statements can be like reading novels in a foreign language, with a sea of jargon obscuring the statements' true meaning. Financial Analysis in

This book is an introductory text on building measurement and estimating for simple buildings in Hong Kong, based on the Hong Kong Standard Method of Measurement of Building Works 4th Edition Revised 2018 (HKSMM4 Rev 2018). It provides a toolkit for students and surveying technicians who are new to the subject. This second edition updates the contents in line with the HKSMM4 Rev 2018 and incorporates the latest industry developments such as BIM. The main text is divided into five parts following the development of a typical project. Part 1, Building the project team, introduces the team setup for a typical project. Part 2, Deciding the procurement strategy, explains the various procurement decisions to be made by an employer before any cost estimating and measurement work takes place. Part 3, Preparing for tender, covers the tendering methods, tender documentation and approximate estimating techniques used by Quantity Surveyors. Part 4, Measuring quantities, introduces measurement principles and HKSMM4 Rev 2018, followed by a detailed review of the measurement methods for each major trade, with worked examples. Part 5, Estimating unit rates, explores the basic techniques for unit rate preparation. The book contains worked examples from real Hong Kong building projects, self-assessment questions, reminders and points of note. It is essential reading for Hong Kong construction and surveying students, international Quantity Surveyors working in the local area and those wanting international examples of Quantity Surveyors practice.

Hong Kong and Macao have much in common. The dominant populations in both territories are Cantonese-speaking Chinese; both are small in area; both are urban societies; both have been colonies of European powers; and both have undergone political transition to reunification with China. Yet in education, for reasons that are analysed in this book, they are very different. The patters of similarities and differences in the two territories make a fascinating basis for comparative study. The overarching theme of the book, on continuity and change is particularly pertinent following the transition of the two societies of the postcolonial era. This thoroughly-revised and expanded second edition builds on the widely-acclaimed first edition. The work has been recognised as a significant contribution to the broad field of comparative education as well as to study of the specific societies which are its main focus.

Hong Kong Taxation: Law and Practice 2008-09 is a professional book on the Hong Kong tax system. It explains in detail the three main categories of taxes under the Inland Revenue Ordinance: Property Tax, Salaries Tax, and Profits Tax. Chapters cover Stamp Duty and the international aspects of Hong Kong taxes. The book is available in Chinese as well, translated by Ayesha Macpherson.
