The scuttling of the German fleet took place at the Royal Navy's base at Scapa Flow, in the Orkney Islands of Scotland, shortly after the First World War. The High Seas Fleet was interned there under the terms of the Armistice whilst negotiations took place over the fate of the ships. Fearing that all of the ships would be seized and divided amongst the Allies, Admiral Ludwig von Reuter decided to scuttle the fleet. The scuttling was carried out on 21 June 1919. Intervening British guard ships w

Scuttling of the German fleet at Scapa Flow - Wikipedia

Scapa Flow is a body of water about 120 square miles in area and with an average depth of 30 to 40 metres. The Orkney Mainland and South Isles encircle Scapa Flow, making it a sheltered harbour with easy access to both the North Sea and Atlantic Ocean.

The Naval Wrecks of Scapa Flow by Peter L. Smith (1989-10)

The strategic importance of Scapa Flow for the Royal Navy made it imperative to remove the wrecks that posed an immediate threat to navigation. The company Cox and Danks bought the rights to exploit the wrecks and began the salvage operation. Innovative processes, despite repeated failures, allowed the company to salvage 32 ships.

Scapa Flow, the largest shipwreck graveyard in Europe

Scapa Flow is a body of water in the Orkney Islands, Scotland, sheltered by the islands of Mainland, Graemsey, Burray, South Ronaldsay and Hoy. Its sheltered waters have played an important role in travel, trade and conflict throughout the centuries. Vikings anchored their longships in Scapa Flow more than a thousand years ago. It was the United Kingdom's chief naval base during the First and Second World Wars, but the facility was closed in 1956. Scapa Flow has a shallow sandy bottom not deeper

Scapa Flow - Wikipedia

It was the greatest act of naval suicide in history. Although many of the ships were subsequently salvaged, 8 remain. These, along with wreckage from salvage sites, wrecks from other naval activity, as well as civilian wrecks, make Scapa Flow a wreck diver's paradise. The question is, how do you dive them?
