A guide to some of the world's most fascinating places, as seen and experienced by writer, television host, and relentlessly curious traveler Anthony Bourdain. Anthony Bourdain saw more of the world than nearly anyone. His travels took him from the hidden pockets of his hometown of New York to a tribal longhouse in Borneo, from cosmopolitan Buenos Aires, Paris, and Shanghai to Tanzania's utter beauty and the stunning desert solitude of Oman's Empty Quarter—and many places beyond. In *World Travel*, a life of experience is collected into an entertaining, practical, fun and frank travel guide that gives readers an introduction to some of his favorite places—in his own words. Featuring essential advice on how to get there, what to eat, where to stay and, in some cases, what to avoid, *World Travel* provides essential context that will help readers further appreciate the reasons why Bourdain found a place enchanting and memorable. Supplementing Bourdain's words are a handful of essays by friends, colleagues, and family that tell even deeper stories about a place, including sardonic accounts of traveling with Bourdain by his brother, Christopher; a guide to Chicago's best cheap eats by legendary music producer Steve Albini, and more. Additionally, each chapter includes illustrations by Wesley Allsbrook. For veteran travelers, armchair enthusiasts, and those in between, *World Travel* offers a chance to experience the world like Anthony Bourdain.

If you have ever wondered about space travel, now you have the opportunity to understand it more fully than ever before. Traveling into space and even emigrating to nearby worlds may soon become part of the human experience. Scientists, engineers, and investors are working hard to make space tourism and colonization a reality. As astronauts can attest, extraterrestrial travel is incomparably thrilling. To make the most of the experience requires serious physical and mental adaptations in virtually every aspect of life, from eating to intimacy. Everyone who goes into space sees Earth and life on it from a profoundly different perspective than they had before liftoff. Astronomer and former NASA/ASEE scientist Neil F. Comins has written the go-to book for anyone interested in space exploration. He describes the wonders that travelers will encounter—weightlessness, unparalleled views of Earth and the cosmos, and the opportunity to walk on another world—as well as the dangers: radiation, projectiles, unbreathable atmospheres, and potential equipment failures. He also provides insights into specific trips to destinations including suborbital flights, space stations, the Moon, asteroids, comets, and Mars—the top candidate for colonization. Although many challenges are technical, Comins outlines them in clear language for all readers. He synthesizes key issues and cutting-edge research in astronomy, physics, biology, psychology, and sociology to create a complete manual for the ultimate voyage.
