Manual Therapy: NAGS, SNAGS, MWMS etc. - 7th Edition ... NAGs and SNAGs are mobilisation techniques and are used as part of the Mulligan Concept. NAGs are used on the cervical spine (neck) as well as the upper thoracic spine (upper back). SNAGs are used throughout the spine, rib cage and sacroiliac joint (tail bone). They are also used to treat limb problems that have occurred as a result of spinal problems. SNAGs are gliding mobilisations and should be performed pain free. NAGs mobilise joints mid way through range of movement whilst SNAGs ...
Nags And Snags - Manual Therapy - Physiotherapy ... Brian Mulligan's concept of mobilizations with movement (MWMS) in the extremities and sustained natural apophyseal glides (SNAGS) in the spine were revolutionary due to this concurrent application of both therapist applied forces and patient generated movement.
Mulligan Concept » Mulligan Concept - Manual Therapy The concept of Mobilizations with movement (MWM) of the extremities and SNAGS (sustained natural apophyseal glides) of the spine were first coined by Brian R. Mulligan. Mobilization with movement (MWM) is the concurrent application of sustained accessory mobilization applied by a therapist and an active physiological movement to end range applied by the patient.
