"From epic fail to happily ever after" - The New Indian Express Overnight sensations do not become literally so overnight; virtuosos are not always born so; and success... well, there never really is such a thing as success without having tasted the bitter fruit of failure. This book celebrates ten such moments of failure that drove ten different individuals to cut new paths for themselves. Celebrating Failure chronicles the lives, journeys and major failures of these people from different walks who were once rejected or told that their ideas or talents weren't good enough, only to break away from such negative molds and assumptions to be who they are today. The following people's narrative awaits you: • Anupama Joshi (First female Wing Commander of the Indian Air Force) • Arunabh Kumar (Founder and The Chief Experiment Officer, The Viral Fever Media Labs) • Nehha Bhatnagar (Youngest arts impresario in India) • Rahul Arya (India's first sand artist) • Archy Jay (India's first female bagpipe artist) • Diwakar Vaish (Creator of India's first dancing robot, India's first 3D-printed robot, India's first mind-controlled robot and the world's first brain controlled wheelchair) • Alisha Abdullah (India's first female national racing champion) • Varun Rajput (Founder, producer and guitarist, Antariksh) • Mithali Raj (Captain, Indian female cricket team) • Kunal Arora (Founder, The Education Tree) From now, start celebrating failure. Maybe, just maybe, the greatest successes come from having the freedom to fail. May failure be with you! #CelebrateFailure

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.

Key pedagogical features include: end of chapter 'study questions' case studies that discuss topical issues with study questions also provided useful tables and figures which illustrate key regional trends in East Asia Extensive summary conclusions covering the chapter's main findings from different international political economy perspectives. There are many books on the market that discuss the Toyota Production System but few that insightfully analyze its marketing strategy. Authored by former Toyota marketing executives, this is the first book of its kind to detail how Toyota's thinking habits go beyond the shop floor and influence and guide Toyota's marketing function. Toyota has expanded from a venture enterprise to one of the biggest global enterprises because of its innovative mindset (Toyota thinking habits) using Breakthrough Thinking, which supports a new philosophical approach to problem solving, turning 180 degrees away from conventional thinking. Written by Toyota's former executive managing director and founder of Breakthrough Thinking, Toyota's Global Marketing Strategy: Innovation through Breakthrough Thinking and Kaizen: Explores Toyota's "Breakthrough Thinking" Examines how Toyota conducts information gathering.

Illustrates how Toyota builds and maintains its unique business culture Shows how Toyota "goes to the customer" and comprehensively studies how customers use their products Reveals Toyota's cars have become some of the biggest selling models in the USA The authors of this book explore Toyota thinking habits as well as Toyota's global marketing strategy, which, since the 1980sa, has been expanding exponentially. The reader will understand the importance of thinking habits in the workplace and will know how to apply them using Toyota as the prime case study.

The ongoing progress of globalization has created a new need in multinational and international companies for managers who have the skills and competencies to be rotated anywhere in the world. While most books addressing global management have focused on the practitioner experience, theory, or academic knowledge relevant to one region or country, Global Enterprise Management unites all these approaches in a practical framework designed to provide students, educators, and practitioners with the skills to succeed in the global managerial landscape. Inspired by his 35 years in international hospitality management, Camillo brings together an interdisciplinary team to break down the challenges facing managers in global companies, including supply chains, business ventures, technology, accounting, marketing, and human resources. A collection of real-world case studies grounds theory in contemporary practice and directs the conversation toward the future.
